

1 List of Changes

- Use L^AT_EX (instead of Microsoft Word) to typeset the report, using the `uw-wkrpt.cls` class by Simon Law, et. al. (The class was modified to note that the report is a resubmission in the letter of submittal; changes can be found at <https://github.com/cbhl/uw-wkrpt-resubmit>.) This should resolve most of the issues in "general formatting".
- Change the title to be more descriptive.
- Fix the name and location of the employer on the cover page. (YouTube, LLC is owned by Google Inc.)
- Update the report date.
- Make the letter of submittal more like the sample letter.
- Insert an Executive Summary before the ToC.
- Merge 'Background' and 'Problem' to two subsections of a section called 'Introduction'.
- Replace 'Justification' with an 'Analysis' section, detailing criteria and alternatives, placing it before the recommendation.
- Insert a 'Conclusion' section after the new 'Analysis' section and before the 'Recommendations' section.
- Replace figure 'Preview Request Flow' with 'Swimlane Activity Diagram'.
- New figure: 'Network Diagram' to show domain and environment.
- New figure: 'Sample Edit List' to provide context.
- New figures: 'Positionable/Trimable Audio - User Interface', 'Positioning Audio', 'Trimming Audio' to provide context.
- Add a label to the table in Appendix A.
- Provide more context in the problem statement.
- Look at more plausible alternatives than the ones considered in the original report.
- Infer a recommendation based on the assumptions and the results of the analysis (as opposed to just making a straightforward, but possibly inaccurate recommendation).
